

Liko Viking XL  
Heavy Lifts are Easy

**Horizontal lifts in balance**  
With FlexoStretch and a Stretch leveller, even the heaviest patients can be lifted in a horizontal position.

## For the most demanding lifts

**Safe and secure gait-training**  
Armrests and Liko LiftPants make Viking perfect in gait-training situations.

Lifting heavy patients entails great responsibility. Although Viking XL has been specifically developed for very heavy patients, it is also suitable for average-sized people. Despite its size, Viking XL weighs only 95lbs and is very easy to handle.

A lifting capacity of 660lbs makes Viking XL ideal for heavy lifting situations, including lifts from the floor. Equipped with Armrests as an accessory, XL is ready for walking training and can be an invaluable aid to rehabilitation, even for extremely heavy patients.

Specialty Medical Equipment rents and offers lease-to-own programs on the complete line of Liko Viking lifts. Sizes range from S, M, L, and XL.

### Liko Viking Specifications

Size	Weight	Lifting Capacity
S	55lbs	350lbs
M	77lbs	450lbs
L	80lbs	550lbs
XL	95lbs	660lbs
