To Whom It May Concern

Hattie Ide Chaffee has been using Specialty Medical for about 3 years. They continue to supply us with exceptional products and outstanding support services. With the guidance of our wound consultant, Lisa McDonald, our wounds have shown dramatic improvement, some healing within 4 weeks or less. We especially like the V1STA™ System which helped us to heal one resident's Stage III and IV sacral wounds within 6 months. We have used to wound vacuum on several more of our residents, again with dramatic improvement in a short time.

Lisa provides us with excellent staff training and informative inservices. We are fortunate to have her as part of our "team."

Sincerely,

*Edie Murphy* RN DON
