

Specialty Medical Equipment Furniture Division

For years, Specialty Medical Equipment has been dedicated to providing durable medical equipment to hospitals, skilled nursing facilities, assisted living facilities, doctors' offices and recovering patients. With such a widespread presence in the industry, covering all of New England, it became evident to SME that adding furniture to the equation would bring more value to the customer.

We understand the challenges a renovation or new construction project can pose. The closer you get to completion, the greater the pressure to stay on schedule, and on budget. The furniture items offered are designed to complement patient rooms, common areas, waiting rooms, office and dining areas and can be purchased with no minimum requirements.

Because we know the healthcare industry inside and out, we understand a room must not only be aesthetic, but it must be functional for the patients and caregivers alike. Specialty Medical Equipment ensures prompt and reliable sales and service support.
